

Welcome to our computers section.

We have split our computer systems into three groups for your convenience. One being 'Complete Systems', the other is 'Do It Yourself (DIY) Systems', and finally 'Laptops/Notebooks'.

The 'Complete Systems' include everything you need to run a new desktop computer. This includes a Monitor, Keyboard & Mouse, the Tower (computer itself), licensed operating system (Windows), and physical assembly service charges.

The 'Do It Yourself (DIY) Systems' come in box form, which means you would come in and pick up the components still in original packaging and physically assemble the desktop computer yourself. These systems DO NOT include Monitors, Keyboard & Mice, Software/Operating system (Windows).

**Please select the type of computer you would like to view:**
